EXPERIMENTAL DETERMINATION OF POTASSIUM VAPOR PRESSURE IN THE 550° TO 1,200° C TEMPERATURE RANGE. N. S. Grachev and P. L. Kirillov. July 1961. 7p. OTS price, \$0.50. (NASA TECHNICAL TRANSLATION F-66. Translation from *Inzhenerno-Fizicheskii Zhurnal*, v. 3, no. 6, June 1960, p. 62-65 (SSR).)

An attempt was made to verify published data from experiments by Makansi, et al., and to broaden the previously investigated temperature interval. The potassium melting point was found to agree with other published data, but experiments yielded lower values for sodium and potassium vapor pressure than did those of Makansi, et al.
